

Tax Reimagined

Reimagining the tax function of the future

There is no shortage of challenges and opportunities facing today's tax functions. Carrying on as in the past is not a viable option. You need to be ready to be compliant and ready for the changing digital future of tomorrow. Tax is your license to do business. Tax Reimagined is the discussion you need to have now.

The challenge

The volume and pace of change in the tax environment is unprecedented. Complex and uncertain times need different tools and skills to manage the business of tax. Yet, investment has lagged behind. Your workload has increased while your resources have diminished. You need to not only be compliant today but ready for the digital world of tomorrow. Meanwhile the business continues to demand tax support. What's the answer?

Global trends disrupting the tax function

The opportunity

At KPMG we have combined our technology, transformation and compliance capabilities under a new framework — Tax Reimagined. Deploying our solution architects and leveraging this framework, we can help you develop a strategy for your tax function and design a target operating model to help ensure execution; reduce costs, improve quality and unlock value from your tax and statutory function.

These days, tax makes headlines. This is the impetus to shift the conversation, to lay the foundation of an irresistible business case for investment in tax infrastructure. This takes the form of new tax operating models, technology tools and capabilities which are more adaptable and configurable to tax needs and flexible new ways of approaching sourcing. For example, large scale finance transformation projects and disruptors like emerging technologies means tax functions need new ways of working which, in turn, can also embed continuous improvement for sustainable change.

Tax Reimagined in practice

KPMG's Tax Reimagined solution architects collaborate with you to bring tax expertise, a deep understanding of technology and innovative operating model designs to work alongside you to reimagine your tax function. This will involve designing a target operating model that combines transformation, with the right blend of managed services and technology to help the gears of your business work together to accomplish your goals.

Throughout this document, "we," "KPMG," "us" and "our" refer to the network of independent member firms operating under the KPMG name and affiliated with KPMG International or to one or more of these firms or to KPMG International. KPMG International provides no client services. No member firm has any authority to obligate or bind KPMG International or any other member firm vis-à-vis third parties, nor does KPMG International have any such authority to obligate or bind any member firm.

Case study — a global pharmaceutical company

A global pharmaceutical company with a presence spanning over 95 countries needed help to develop a new tax operating model. The high cost of compliance and escalating regulatory challenge needed new thinking. The in-house compliance team was not well integrated into the finance function and the cost of investing in new tax technology infrastructure was considered too high.

Using our Tax Reimagined approach, we helped the client determine their optimum delivery model and provided the necessary challenge to build the business case for change.

Today the client operates cost-effective, globally standard tax compliance processes. We successfully transitioned their compliance team into the supportive environment of the KPMG Center of Excellence. Tax leadership benefits from rapid global visibility of risks and issues and new insights and value from its data. Together, we have future-proofed their compliance processes.
